Apr. 2016 – May 2018

Delhi, India

Technical Skills

Languages: JavaScript, HTML/CSS, Java

Developer Tools: VS Code, Postman, Vite, Netlify, Vercel

Technologies/Frameworks: React, Tailwind, Redux, Github

Projects

MovieDB | *React, Tailwind, TMDB API*

- Developed a React web app with React Router, custom axios hook, and responsive Tailwind CSS for efficient and user-friendly frontend development.
- Successfully integrated TMDB API for real-time movie data retrieval, demonstrating proficiency in working with external APIs.
- Implemented clean state management with useState and Context API for user authentication and watchlist features.
- Created modular and reusable UI components, adhering to clean code practices to maintain code quality and promote reusability.

The Pizza Co. | *React, Tailwind, Redux Toolkit*

- Developed a React web app to order tasty Pizzas with React Router, Redux Toolkit, and Tailwind CSS for seamless user experience.
- Managed the global state efficiently with Redux Toolkit.
- Successfully fetched the data from the API using the latest React Router's features.
- Created modular and reusable UI components, adhering to clean code practices to maintain code quality and promote reusability.

Qkart | *React, Bootstrap, Material UI*

- Developed a React Ecommerce store with React Router, Axios and Material UI
- Implemented the core logic for authentication, shopping cart and checkout.
- Improved UI by adding responsive design elements for uniform experience across different devices.
- Utilized REST APIs to dynamically load and render data served by the backend server

QTrip | *Vanilla Javascript, Bootstrap*

- Developed a travel website with pure javascript and bootstrap
- Improved UX with multi-select filters, image carousels
- Utilised localStorage to persist user preferences at client-side

Relevant Coursework

- Data Structures and Algorithms
- Database Management
- User Interface (UI) Design
